Available in sizes of 150 of 200ml, they can be used for not only samples but also commercial products. Choose the design and capacity to suit your product concept.

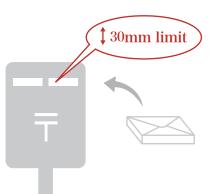

## YP-A Series – Slim rectangular bottles with engraved wood pattern for postal delivery

#### Postal delivery size

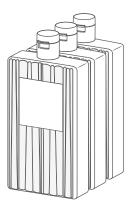

The thickness of the bottle is 25mm, so even with the use of an outer box. the total size can be less than 30mm. The bottles offer a stronger presence than flexible packaging and can stand on their own.

Slim and convenient to take on the go!

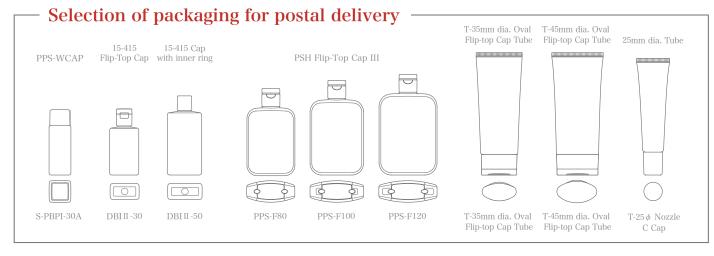

### Space-efficient design

Rectangular shape saves space when put on display.

\* The front of the bottle is available with 2 different panel sizes. The back panel is the same for both options.

\* Material: HDPE (contains 30% biomass PE) / Molding method: Extrusion blow molding
