

NJX-500

New square biomass PE bottle with stylish engraved design

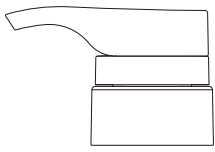

Pump : PD3033E VI Pump
(Scheduled for launch in May)
PD3033HVR Pump, YS ALM CAP
Bottle : NJX-500

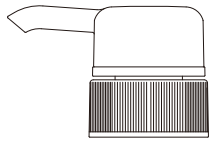

A new square bottle with a 3CC pump has been launched with two different engraved designs. The design allows you to choose the engraved pattern on the front to match the product image, offering a variety of impressions. The bottle has a capacity of 500 mL and is recommended for hair and body care products. The bottle is an environmentally friendly product containing 30% biomass PE.

■ Display-friendly square shape

The stable, square design looks great on display and leaves no dead space on the shelf.

Molded with plant-derived raw materials

These bottles are made with biomass plastic, where molasses from plants (e.g. sugar cane) is converted into plant-derived ethylene and used as the raw material to produce the resin.

■ Choice of 2 designs for the front

All 4 sides can be printed or labelled.
High-impact, eye-catching design.

Silkscreen or pad printing possible

Pad printing only

■ Selected square bottle series
